## Unix Wikipedia

January 15th, 2019 - The Unix system is composed of several components that were originally packaged together. By including the development environment, libraries, documents, and the portable, modifiable source code for all of these components, in addition to the kernel of an operating system, Unix was a self-contained software system. This was one of the key reasons it emerged as an important teaching and learning

## shell Difference between ls l and ll Unix amp Linux

January 17th, 2019 - I'm relatively new to programming as a whole and some tutorials have been telling me to use `ls l` to look at files in a directory and others have been saying `ll`. I know that `ls` is a short list but
